## *VCI-WIRE for Corrosion Protection of Pipe*

VCI wire strip is designed for corrosion protection of tubes, pipes or conduits of up to 6 inches in diameter in storage or during shipping. For larger diameters than 6 inches use [VCI powder](#) or [VCI liquid for fogging](#) interiors.

The wire strip is placed inside the tube or pipe diameters of up to 6 inches, which is then capped or sealed. The length of the wire strip should equal the length of the pipe. Within hours, the vapors from the wire strip saturate the enclosed air space.

## **LONG TERM CORROSION PROTECTION OF CLOSED SPACE**

The slow release vapor action protects the exterior as well as hard-to-reach interior surfaces. It is self-healing and will provide 24 months of long-term protection for storage and overseas shipments.

## **METALS PROTECTED**

carbon steels, stainless steels, copper, brass, aluminum, silver, galvanized steel, solder, silicone steel.

## Typical Properties

**500 Feet per Roll**

Diameter: 3 mm (-+1 mm)

Color : Blue

Shelf life: 2 years

Life span: 2 years
