HOW TO USE EVAPO-RUST Safe Rust Remover

Pictures from SIMA-San Diego Naval Facility

COMPLETELY IMMERSE ITEM *

EVAPO-RUST is easy to use. Fully immerse the rusted item in EVAPO-RUST and check progress in about 30 minutes; no scrubbing necessary. Soak times will vary from 30 minutes to 24 hours depending on severity of rust, type of steel, and temperature. **EVAPO-RUST** is water based, therefore the active molecules will slow down as temperature decreases and increase as temperature increases. We recommend utilizing EVAPO-RUST at a <u>bath temperature above 60° F (normal room temperatures)</u>.

Once rust is removed, rinse item with water. NO NEED TO NEUTRALIZE
You can now paint, plate, or apply a long term <u>Corrosion Preventative</u> Compound such as <u>Nox-Rust 3100</u>, <u>Permanent Coating</u>, <u>Corrosion Inhibitor or VCI protective packaging</u>.
For short term rust inhibition, simply dip the item in <u>EVAPO-RUST</u> and allow to dry.
For longer term protection use <u>VCI Paper</u> or <u>VCI plastic film packaging</u>.
Rinse with ordinary water before painting, plating or applying a surface <u>protective corrosion inhibitor</u> or <u>coating</u>.

* For items too large for immersion call 1-866-577-2326 and ask about the PATCH

Evapo-Rust Health & **Environmental Analytical** PH 6.1 Neutralizing NOT REQUIRED Non-Hazardous No VOC - NO HAP ■ Non-Corrosive (NACE TH0169 = <6.35 mm/yr) Not Orally Toxic (LD50 >5g/kg) Not Dermally Toxic (LD50 > 2000mg/kg) Not an eye irritant (ΜΜΤS = 0.0) ■ Not a skin irritant (PDII = 0.9) Spent material is Non-Hazardous Removes rust by Selective Chelation No DOT Restrictions

<u>Rust Remover F.A.Q.</u>

- Biodegradable, Non-Hazardous Evapo-Rust specifically targets Iron oxide*
- Evapo-Rust Safe Rust Remover does not harm aluminum, brass, copper, plastic, rubber, silicon, wood, felt, or glass (de-rust without dis-mantling)
- Evapo-Rust Safe Rust Remover

must be used as a liquid (wet process)

- Safe Rust Remover does not affect plating
- Safe Rust Remover does not affect non-oxide paints

Evapo-Rust works best <u>above</u> 60 F (Room Temp)

 <u>Evapo-Rust</u> does remove "sacrificial coatings" such as bluing, browning, zinc, or other oxides.
 *Hematite - α Fe₂O₃ and - Fe(OH)₃, Goethite are not affected by <u>Evapo-Rust</u> <u>Safe Rust Remover</u>
