

KPR VCI HEAT SHRINK FILM and Heat Shrink Bags

PRODUCT DESCRIPTION

VCI heat shrink packaging is made with the latest polymer technology. Our unique 3 layer shrink film will provide maximum strength, flexibility and puncture resistance needed in aggressive shrink application. Our films are Impregnated in low temperature with vapor corrosion inhibitors (VCI's) to protect ferrous and most non-ferrous metals from corrosion.

LONG TERM CORROSION PROTECTION

The slow release vapor action protects the exterior as well as hard-to-reach interior surfaces. It is self-healing and will provide 24 months of long-term protection for storage and overseas shipments. Shrink the metal object with a VCI heat shrink film or bags, The VCI in the film volatilizes and migrates with air then condenses on all metal surfaces, reaching all exposed and recessed areas.

METALS PROTECTED

Carbon steels, stainless steels, copper, brass, aluminum, silver, galvanized steel, cast iron.

Properties	Test method	Unit	4 Mil	5 Mil
Tear strength MD	ASTM D1004	PSI	2490	2850
Tear strength TD	ASTM D1004	PSI	2330	2790
Elongation MD	ASTM D882	%	740	870
Elongation TD	ASTM D882	%	935	1000
